Digital sign-out Sheet

Do you need to monitor the passage of the cleaning crew in a public place? Smilio E is the perfect digital sign-out sheet for this.

LOG PASSAGES TO THE CLOUD

Smilio E logs the passage of any member of the team, and send data to the cloud in real time.

INFORM USERS

Final users can see the last time a cleaning operation was done. The digital sign-in/out sheet is used in Airports, company premises, museums, shopping malls or railway stations.

PRODUCT DESCRIPTION

HOW IT WORKS?

Digital sign in/out sheet

Each time that a member of the cleaning team visits the facilities, they pass a magnetic key on the device. This will log the data into the cloud, and update the integrated information screen. The cloud interface allows

you to consult or download data any time and from anywhere.

Issue reporting

Integrated connected buttons allow users to report any problem in the facility, or rate the service quality. This capability can be limited to authorized personal.

For instance, here is a short list of issues that can be reported:

- Soap not available (low level or clogged pipe)
- Toilet paper missing
- Cleanliness
- Odor

Fully customizable design

The digital sign-out Sheet is personalized to match your visual identity. You can also decide the kind of issues you want to implement, or choose to make a smiley survey instead.

Wireless for years

Thanks to our LPWAN technology, the connected sign-in sheet runs for years with one set of replaceable batteries. Therefore, you can place it everywhere without restrictions due to the power supply.

Wall mounting

The sign in/out device is equipped with fixing holes, and can also be attached to the wall with high performance double-sided tapes.
