SKPF000401

Digital Timesheet: Clock E

Made from wood and reclaimed materials, the digital timesheet Clock E offers 3 functionalities in a single terminal:

- Display of the date and time of the last entry.
- On-site staff check-in using RFID/NFC badges.
- Collection of customer feedback and reporting of anomalies.

It can communicate wirelessly for several years on batteries, and it is compatible with any timesheet App.

PRODUCT DESCRIPTION

DURABLE, ECO-DESIGNED, AND STYLISH

In addition to being eco-designed with reclaimed wood, the Clock E terminal integrates seamlessly into well-

designed restrooms, encouraging users to participate in improving service quality.

DIRECT USER INFORMATION

In restrooms, it's essential to communicate the frequency of cleaning performed to reassure users. With each staff entry, the integrated e-paper screen of the digital timesheet clearly and visibly displays the time of the most recent entry.

STAFF CHECK-IN ON THE DIGITAL TIMESHEET

Staff members register their entry on Clock E terminal using a RFID/NFC badge, which may be personalized. When the badge is swiped, the displayed entry time on the screen of the electronic timesheet is updated. At the same time, the check-in is sent to the cloud for later use. No more need to check paper sheets behind doors: everything is done automatically. Time management becomes easier with the online timesheets.

CUSTOMER FEEDBACK

The Clock E check-in terminal is equipped with 5 cutomizable buttons that allow customers:

- To express when they are satisfied with cleanliness

and equipment.
- To report any potential anomaly using one of the buttons.

On the software side, using this terminal allows for automation of:

- The automated reporting of entry times in a digital cloud timesheet software,
- Sending an alert if a delay is noticed,
- Triggering a work request to the relevant teams in response to repeated user reports,
- Reporting the satisfaction rate of users (passengers, visitors, customers, etc.).

ANTIBACTERIAL KEYBOARD

Skiply keyboards are treated with silver nanoparticles that eliminate viruses and bacteria, ensuring impeccable hygiene.

EXCEPTIONAL BATTERY LIFE

Wireless, the terminals have a battery life of several years, and these batteries can be easily replaced.

CUSTOMIZATION OF THE FRONT PANEL

Thanks to its large customizable display area, promote your company to your customers or end-users. The Clock E terminal adapts to your graphic charter.

WALL MOUNTING OF THE DIGITAL TIMESHEET

The included wall mount allows for easy installation, with or without screws, on many types of surfaces.
