Smilio S - 2 thumbs

Real-time monitoring of customer experience

With its two "thumb" connected buttons, the **Smilio S** survey terminal can be used to conduct continuous surveys "on the spot", in all sorts of public spaces.

PRODUCT DESCRIPTION

With its two "thumb" connected buttons, the **Smilio S** survey terminal can be used to conduct continuous surveys "on the spot", in all sorts of public spaces. The principle is simple: ask a direct question to users to which they can answer with a simple touch of a finger. Placed in the middle of traffic, Smilio terminal offers record voting rates and is unrivalled in collecting both real-time and continuous opinions autonomously.

The results are available a few minutes only after the first votes, and are consulted in Excel files or dashboards. Thanks to our **Smilio** web interface, you can easily create new surveys, manage your terminals and compare the results of your different campaigns. With **Smilio**, you likely have trusted indicators to know

your customers better, to enhance their loyalty and improve your quality of service.

Unique benefits:

- Dual mode Sigfox / LoRaWAN wireless technology.
No wifi, no 3/4G, no infrastructure work required before installation
