Smilio S - 5 options

Real-time monitoring of customer experience

With the Smilio 5-choice survey terminal, it is possible to conduct all kinds of multiple-choice customer surveys: restaurant menus, workshops at trade shows... the possibilities are numerous.

PRODUCT DESCRIPTION

With its five connected buttons, the **Smilio S** terminal can be used to conduct continuous surveys “on the spot”, in all sorts of public spaces. At a simple touch of a button, users can easily and rapidly give their opinion, report a problem or suggest an improvement. Placed in the middle of traffic, **Smilio** terminal offers record voting rates and is unrivalled in collecting both real-time and continuous opinions autonomously. The results are available a few minutes only after the first votes, and are consulted in Excel files or dashboards.

Thanks to our **Smilio** web interface, you can easily create new surveys, manage your terminals and compare the results of your different campaigns. With **Smilio**, you

likely have trusted indicators to know your customers better, to enhance their loyalty and improve your quality of service.
