PRODUCT DESCRIPTION

HOW THE SATISFACTION KIOSK WORKS

The Smiley Signature kiosk is very easy to use:

- Print out the question you want to ask customers. For example: "How do you find the store atmosphere?" , "Did you like the dish of the day?" or "How was the atmosphere at work today?"
- Place the satisfaction kiosk in the appropriate location (store exit, checkout line, stand, coffee machine, etc.).
- It's ready ! Votes are sent to each press. You can view the results in real time from your cloud interface. Data can be accessed from any recent web browser. You can track your indicators from home, even when you are not present in your business premises.

INSTALLATION

The terminal is delivered in a fully equipped package that contains everything to assemble your kiosk. You will see, it's easier and faster than assembling a Swedish bedside table in kit form !

CONNECTIVITY

When ordering, we will ask you to provide the kiosk installation address. We will therefore choose the most suitable telecommunications network. If there is no network, we will contact you to offer you an alternative solution. If no solution exists, we will reimburse you.

Weight

22 kg
